INSTRUCTION MANUAL

[2026]

EXODUS

Exodus is a dual overdrive that combines the raw grit of a RAT-styled pedal and the soulful essence of Bluesbreaker, this pedal is set to redefine your tone game.

The blue side is based on the Marshall Bluesbreaker, with a few modifications such as a JFET boost to accommodate for more headroom in volume levels, while the yellow side is based on the highly sought after 1981 DRV.

When stacked, you get an added third gain stage that allows you to stick out from the mix without that “muddy” effect or sacrificing the clarity of your tone.

Note:

Exodus adopts True Relay Bypass Switching, eliminating pops and hisses. Our advanced relay switching technology ensures pristine sound quality with every stomp.

Toggle Switch:

Switches order between BB > RAT and RAT > BB

RAT

Raw Grit. Heavily inspired by the iconic 1981 DRV, this circuit needs no introduction. Offering snarling distortion to cut through a band mix, this side is perfect for lead tones. With just a touch of the cut knob, wield the power to tame its ferocity and shape your tone.

BLUESBREAKER

Soulful Essence. Derived from the legendary 1991 Marshall Bluesbreaker, our design counteract the lack of output from the original circuit by integrating a JFET boost. Additionally, by incorporating a charge pump feature, we elevated the headroom which enhances tonal richness.

RAT

Level Knob:

Controls the overall output on the RAT side.

Drive Knob:

Controls the overall gain on the RAT side.

Cut Knob:

Controls the amount of high frequencies being cut out on the RAT side.

Clockwise removes high frequencies

BLUESBREAKER

Level Knob:

Controls the overall output on the BB side.

Drive Knob:

Controls the overall gain on the RAT side.

Tone Knob:

Controls the amount of high frequencies from your signal.

Clockwise adds high frequencies.

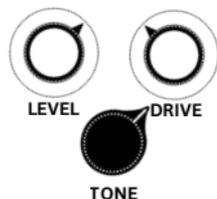

OUR FAVORITE SETTINGS

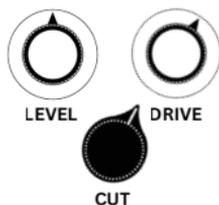

STAGE 1

The Bluesbreaker comes alive with the level past 1-2 o'clock and the drive around 9-10 o'clock, adding an addictive punch and clarity that makes clean tones feel instantly more responsive.

BLUESBREAKER

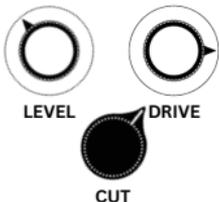

RAT

Set level at unity to a slight boost with the drive around 1-2 o'clock, it delivers focused saturation that cuts through the mix with ease. A subtle turn of the cut knob refines the highs, shaping a controlled, articulate lead tone.

STAGE 2

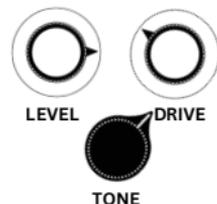

RAT

STAGE 3

The Bluesbreaker functions as an always-on tone foundation, enhancing clarity, body, and dynamic response, while the RAT is stacked to deliver added grit and saturation. The result is a harmonically rich, focused drive that cuts confidently through a live mix, ideal for articulate lead tones and powerful, full-bodied rhythm playing without sacrificing note definition.

WARRANTY

- All pedals are covered by a **1-year warranty** from the date of purchase. This warranty covers manufacturing defects and component failures, including malfunctions related to circuitry, switches, and other components found to be defective. Please note that this warranty **does not cover damage resulting from accidents, misuse, or abuse**. Specifically excluded are:
 - Broken or damaged knobs, pots, and jacks caused by physical impact or mishandling
 - Cosmetic issues such as scratches, chips, or wear to external paint and finishes
 - Malfunctions caused by incompatible or faulty external power supplies
- For warranty service, customers are responsible for shipping costs, except for malfunctions reported **within 10 days of receiving the product**.
- Please contact us with your proof of purchase to initiate a warranty claim.
